

ENKADRAIN, APLICACIONES EN VERTEDEROS, SISTEMA DE DRENAJE, GASES Y LIXIVIADOS

Landfill applications

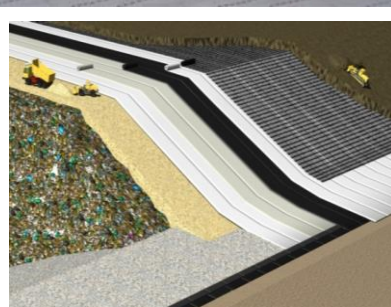

Drainage of:

- Water
- Gas
- Leachates

On capping or in
waste cells

Enkadrain wide drainage Gas

ENKADRAIN, APLICACIONES EN VERTEDEROS, SISTEMA DE DRENAJE, GASES Y LIXIVIADOS

Typical cross-section of a landfill

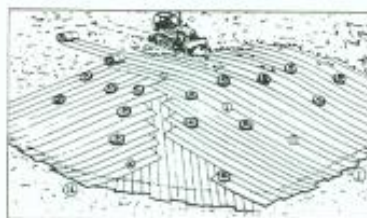

Installation guide for Enkadrain

On slopes the Enkadrain strips should be placed preferably in the slope direction. The strips should be butted up tight.

As a rule the soil cover should be placed on the same day (with regard to UV) that the Enkadrain is laid.

The soil should be pushed out by the machine in the same direction as the Enkadrain has been unrolled.

As protection against wind uncovered sections should be held down with sand bags, car tires, or similar.
